Mounting bore	62 mm
Speed preselection	

Next generation Exact PipeCut 220 Pro Series

What happens when you add a piece of future to our old PipeCut 220E model? The machine becomes **PipeCut 220 Pro Series**. This machine is the choice for you, when you need to cut any small to medium sized pipes of toughest and thickest pipe materials you face. The resulted combination of two: proven Pro Series™ technology and our flagship product, classic PipeCut 220 pipe saw. This new machine is equipped with all the powerful features of Pro Series machines. User friendliness, efficiency, and precision have been improved with a traffic light system enabling the user to cut pipes at the correct travel speed, as well as a laser indicator and an updated adjustment mechanism. The machine's advanced features lets you cut steel pipes with wall thicknesses up to 16mm. Easy to carry, easy to move.

PRICE INCLUDES:

PipeCut 220 Pro Series pipe saw, TCT 140 blade, shoulder bag, pipe support x4, instructions, allen keys 5 mm & 2 mm.
